

Be Prepared!

Our Top Tips will help you avoid those common property insurance issues that can affect the smooth progress of your property insurance claim.

Appoint a Loss Assessor to deal with your claim

Using the services of a professional Loss Assessor will help ensure your claim is dealt with thoroughly and efficiently with nothing missed out or left to chance.

Are your contents or goods damaged?

Don't dispose of any damaged contents or goods before insurers have had opportunity to inspect them. It may prejudice your claim if your insurers cannot see the evidence to support your claim.

Keep your property well maintained

A properly maintained property will not only help prevent damage or loss in the first place, but evidence that you have looked after your property will strengthen your case in the event of you having to make an insurance claim.

Lag exposed pipes

A common cause of winter woes! Prevent bursts from frozen pipes by lagging exposed pipes – your insurer will be more inclined to take your claim seriously if you have taken this simple protective measure.

Going away? Check your Policy T&Cs!

If you are going away (particularly in winter) or your property is to be unoccupied for any extended period, check the Terms & Conditions in your insurance policy regarding heating & water being left on.

Unoccupied property? Keep your insurer informed

Always inform your insurers if your property will be unoccupied for more than the time specified in your policy. Don't risk getting caught out by the small print!

The best tip of all?

Take the hassle-free option and let Action Insurance Repair manage your complete property insurance claim for you with our simple four step process which takes care of everything, from survey and damage assessment to insurance authorisation and quality assured repairs.
